CSC 235: Web and Database Development

Overall this assignment was really to refresh my memory in HTML, CSS and new for me… JAVASCRIPT… Now, we have a server so we can do stuff with PHP, I need to relearn it unfortunately. The assignment wasn't bad, pretty straightforward and I fixed the works cited page from assignment 1, made it APA style. I don't know if we were just adding on to assignment 1 and submitting it to the cloud but that's what I did. Also compressing to a RAR file is still zipping, but I'll just zip using windows.
